Topics

- A. Extraction and purification of bioactive compounds from medicinal plants.
- B. Structural identification of secondary metabolites.
- C. Biological activities and molecular docking.
- D. Pharmacological interests of medicinal plants.
- E. From bioactive molecule to drug discovery.

Objectives

The 3rd National Seminar on Phytochemistry, Pharmacology, and Phytotherapy (SNPPP-3) "Medicinal plants in the service of health, well-being and sustainable development" is a scientific event organized by the Laboratory of Chemistry and Environmental Chemistry (LCCE) in collaboration with the Faculty of Matter Sciences, Batna 1 university. The main objective of this scientific meeting is to facilitate connections among participants including professionals, scholars, and students and to disseminate information about new scientific and biotechnological research in these key areas. The event provides a platform for participants to share their opinions and exchange ideas through plenary and thematic conferences, oral presentations and poster sessions. This seminar also aims to foster and support research projects in various fields of chemistry, biology and pharmacy, promoting interdisciplinary collaboration and innovation.
